REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: With regards to claims 28, 29 and 31-36, the prior art of record does not disclose or fairly teach a waveguide structure positioned at the microstrip-to- waveguide transition such that said RF signals can transition from the transmission lines to the waveguide structure, wherein the waveguide structure is configured to power combine the RF signals with no significant additional losses beyond a loss inherent in said waveguide structure in the transition from the microstrip lines to the waveguide structure, said waveguide structure comprising a waveguide opening positioned at the transition and a waveguide back-short positioned opposite the waveguide opening at the transition; a metallic plate on which the dielectric substrate is supported, and a back-short cavity formed within the metallic plate at the transition to form the waveguide back-short. With emphasis on the back short cavity formed within the metallic plate and power combining the RF signals.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Ammar US Patent 6,707,348.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
